Finances	70% latest Jan. 23, 2000	39% June 21 and 28, 2009

Methodology: Interviews for the ABC News Consumer Comfort Index are reported in a four-week rolling average. This week's results are based on telephone interviews among a random national sample of 1,000 adults in the four weeks ending October 31st, 2010. The results have a 3-point error margin. Field work by ICR-International Communications Research of Media, Pa.

The index is derived by subtracting the negative response to each index question from the positive response to that question. The three resulting numbers are added and divided by three. The index can range from +100 (everyone positive on all three measures) to -100 (all negative on all three measures). The survey began in December 1985.
